Applicant

UNISYS CORPORATION et al

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translations to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide

2. Citations and explanations (Rule 70.7)**Citations:-**

US 5764845

WO 2000/007376 A1, published 10 February 2000, equivalent to US 6456339 cited in the search report.

US 5311337

US 5321789

US 5764845 and US 5321789 both disclose an optical layer having an array of light guides, with first and second ends in first and second lattice patterns. In US 5321789 the first and second lattice patterns are identical. US 5764845 fig 2A & 2B disclose the light guides as having square and hexagonal first and second lattice patterns respectively. Claims 1-7 are fully disclosed and lack novelty and inventive step in the light of these documents. US 5321789 further discloses use of the optical layer in a display device. Claims 8-10,15-17,19 and 20 appear to be fully disclosed and lack novelty and inventive step in the light of US 5321789. The optical layer of US 5764845 could be used in the display device of US 5321789 to arrive at the display device of claims 11-14, which lack inventive step.

US 5321789 and US 5311337 disclose a display device that has hexagonal pixels in an array partially overlapping adjacent pixels. WO 2000/007376 discloses a projection display with overlapping projection regions. Claims 32-37 appear to be fully disclosed by these documents and lack novelty and inventive step.

The prior art listed in the search report does not disclose an imaging screen having an array of light sensitive pixels in combination with an optical layer comprising an array of light guides as specified in claims 21-31. The invention of claims 21-31 is considered novel and inventive over the prior art cited in the search report. Similarly, the invention of claim 18 does not appear to be disclosed or suggested by the prior art.
